## TITANIUM NIOBIUM (TI-NB) THREADLESS PINS

**Titanium Niobium (Ti-6Al-7Nb) ASTM F1295** is a Titanium alloy containing 6% Aluminium and 7% Niobium. In comparison to Ti-6Al-4V the replacement of Vanadium to Niobium results in even higher corrosion resistance and excellent biocompatibility. Titanium Niobium has its main use in the medical and dental industry to make implants. The alloy shows high compatibility to ingrowth to the human body. Therefore, the application for Piercing Jewelry is a great match.

# TITANIUM NIOBIUM (TI-NB) THREADLESS PINS

*Titanium Niobium (Ti-6Al-7Nb) ASTM F1295 is a Titanium alloy containing 6% Aluminium and 7% Niobium. In comparison to Ti-6Al-4V the replacement of Vanadium to Niobium results in even higher corrosion resistance and excellent biocompatibility. Titanium Niobium has its main use in the medical and dental industry to make implants. The alloy shows high compatibility to ingrowth to the human body. Therefore, the application for Piercing Jewelry is a great match.*
